

The Ultimate Presentation

Mr Prospect, I'm sure you'll agree that the life blood of your business is leads. And getting quality leads can be VERY CHALLENGING.

Because – as I'm sure you know – industry research shows prospects need as much as SIX MONTHS before they are ready to go ahead and have you list their home. What does this mean? It means that it give them 6 months to change their mind, find a “for sale by owner” and kick you out of the deal, or just disappear into the tragic real estate black hole.

So it's difficult to strike the right balance between keeping your name hot on their minds while not coming across as desperate or ‘salesy’. You know... the endless follow-up game.

And the biggest problem is that all the OTHER realtors in your area are busy contacting the same prospects they find on Facebook, Zillow, or Trulia. And, if YOU ease up on contacting your prospect, some OTHER realtor – who just ‘happens’ to be at the right place at the right time – will get the business instead of you.

And ALL YOUR HARD WORK will be wasted.

So, if I could show you a FAR BETTER – MORE EFFECTIVE - way you could effectively target “NOW” homebuyers – but in a non-salesy, ‘under the radar’ way that literally hand picks the best leads, so that when they ARE ready to begin the home buyer process, YOU are the GO-TO REALTOR they will see... PRECISELY at the RIGHT time, would you be interested?

[Pause]

What's more, this method works on complete auto-pilot, so – once my team of highly skilled programmers have set it up - you don't have to even think about it.

So, while your competitors are running around like headless chickens wasting all their time on the same bogus leads , you can RELAX, confident that – THE MINUTE your prospect is ready to go ahead – it will be YOU the prospect sees when they are READY TO BUY while your dismayed competitors will be left CHOKING IN YOUR DUST wondering what happened!

To do this we deploy some battle-hardened technology you probably haven't heard of since it is sparkling new in the Real Estate Industry.

With this method, we are able to leverage Google's technology to target RIPE and READY homebuyers based on their search habits.

Usually these are buyers moving here from other areas. You just catch them when they are close to being ready to view homes.

This means you will experience less chasing of leads who are not ready to buy! Also, this will cut down on the bogus leads that give you invalid information... because they are MOTIVATED!

Well, that's an example of the POWERFUL technique we can deploy on your behalf to get your name right there – front and center – in your prospect's mind in the most subtle – yet HIGHLY EFFECTIVE –way possible.

There's a saying in business, which you might have heard.

“Location, location, location”.

Well... we say... Timing, timing, timing.

So once your prospect has seen your ad at the RIGHT TIME, it will be subliminally implanted deep in their subconscious mind that YOU are the ‘Go-To Real Estate Agent’ and so they won't even THINK of asking any other realtor but you to be their agent.

But - as you will readily understand - this works best if only a LIMITED number of realtors in each area has the advantage of using our system.

So, as one of the CHOSEN realtors in this area, I'm offering it to YOU FIRST.

So, if you are interested in hearing more, then we'll be happy to answer your questions ...

But you can't experience our 5-star service and RESULTS... unless we hear back from you.
